OVERVIEW

WHAT MAKES IT FLY?

- Modular OSGi web architecture
  - PaxWeb, Jetty, JSP/JSTL
  - Equinox (plus a little bit of Felix)
  - ~~EclipseLink + Gemini JPA~~
- Modular adapter system → plugins!

PACKAGE DRONE

DEMO

THE FUTURE

- Drone Plugins
- Full REST API
- More repository adapters
- Performance improvements

- First Eclipse release
- Host an instance at Eclipse
- Finer grained access control
- And all the ideas you come up with…

A WORD OF ADVICE

- Use version 0.11.0 to start something new

- Try it out on OpenShift
  - https://hub.openshift.com/quickstarts/90-package-drone
